DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-9, are drawn to the digital pressure display, classified in class 137, subclass 557,
 - II. Claims 10-17, are drawn to the pressure regulator for healthcare purposes, classified in class 604, subclass 119.

Inventions II and I are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the details of the subcombination, as recited in claim 1, are not required for patentability in the combination, as recited in claim 10. The subcombination has separate utility such as displaying pressure for a manufacturing process.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

3. A telephone call was made to applicant's attorney on 9 March 2006 to request an oral election to the above restriction requirement, but did not result in a restriction to one of the following inventions is required under 35 U.S.C. 121:

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
